

Lipo-Shredder

PEPTIDES

This is the most aggressive, cutting-oriented lipotropic formula, combining fat metabolism support with stimulant-like energy and thermogenesis (the dissipation of energy through the specialized production of heat; this occurs in brown and beige adipocytes as well as skeletal muscle)

This is the most aggressive, cutting-oriented lipotropic formula, combining fat metabolism support with stimulant-like energy and thermogenesis (the dissipation of energy through the specialized production of heat; this occurs in brown and beige adipocytes as well as skeletal muscle) **INGREDIENTS LIST**

L-Carnitine: Aids in transporting fatty acids into mitochondria to be converted into energy (ATP); plays a direct role in fat utilization **Methionine:** Supports liver function and fat metabolism; contributes to production of glutathione (antioxidant) **Choline:** Exports fat from the liver; prevents fat from accumulating in the liver; provides cognitive support **Inositol:** Improves lipid profiles, improves insulin sensitivity and metabolic regulation; mood stabilizer **ATP:** Improves lipid profiles, improves insulin sensitivity and metabolic regulation; mood stabilizer **Albuterol:** Stimulant and bronchodilator that increases alertness and increases metabolic drive; thermogenic and cutting effect **B12:** Supports energy metabolism, neurologic function, and red blood cell production **DO NOT REFRIGERATE THIS PRODUCT (BEFORE OR AFTER USE)** 8 (or more) week cycle followed by washout period of half the length of the cycle you completed Fasting not necessary Dose in the morning to avoid sleep disturbances Intramuscular Administration Standard Protocol Take 50-100 units, once per day, 2-3 days per week Advanced Protocol Take 50-150 units, once per day, 3-5 days per week
